

POOL SANITATION AND HEALTH PRE-CAUTIONS

We recently had an issue with fecal contamination in the swimming pool. When this occurs the City requires the pool to be closed and sanitized immediately, since not doing so could lead to health issues for those swimming in the pool after the contamination occurred. If this happens when you are in the pool area, it is the owner's responsibility to alert the management company and the board that an incident has happened.

As an owner, **you** are responsible for any issues that arise from your guests and **must** notify SBB and the board.

Let's remember that we all share our common areas and we all want a safe and healthy environment.
